

Disabling The Boot Loader In The x10 Controller

1. Press Ctrl-U during the bootup procedure while the progress bar is active
2. Select the "Update" button to run Windows Explorer
3. Open the "Program Files" folder
4. Open the "Advantech" folder
5. Open the "Booting Manager" folder
6. Run the "BootingManager" application
7. Disable the "Use Customized Shell" checkbox
8. Select the "Apply" button
9. Select the "Exit" button
10. Restart the controller
11. Verify that the controller boots into the Windows shell (Start Button)
12. The x10 controller should now be similar to a PC running Windows XP
13. If desired, the Merlin II LS application can be added to Startup menu
